

Attorney Docket No.: 6200.200-US

IN THE CLAIMS:

22. (Currently Amended) A needle storage and mounting apparatus for storing a plurality of pen needles and mounting one of the needles onto an injection device, the apparatus comprising:

a cylindrical body having radial cavities complementary in shape to the pen needles;

a cylindrical cover having one opening for accessing one cavity at a time, the cover being rotatable so that the opening can be rotated over a cavity;

A a means for preventing the opening in the cover from being rotated over the same opening more than once;

A a means for preventing rotation of the pen needle while the needle is in the cavity;

And and wherein the apparatus has a height ~~less~~ and diameter and wherein the diameter ~~height~~ is substantially greater than the height ~~diameter~~ so that a user may grasp the apparatus in one hand, exert a rotational force on the apparatus at a two points equidistant from the pen needle thereby maximizing the rotational force on the pen needle and assisting in screwing the pen needle onto the injection device.
